How does the stats::kmeans function chose initial cluster centers?

- Choose k random points in space

- Chose k random observations from the data

- Other

POP QUIZ!

How does the stats::kmeans **function chose initial cluster centers?**

- Choose k random points in space

- Chose k random observations from the data

- Other

Kelly Bodwin
@KellyBodwin

So here's a fun #rstats quiz:

Without looking it up, how does the `stats::kmeans(data, centers = 3)` function choose initial cluster centers?

3 random points in space	41.1%
3 random rows of data	**50.7%**
Other	8.2%
